

Information Security Basic Policy

Linical Corporation deeply recognizes the importance of information security as a key player in pharmaceutical development and is committed to maintaining information security with the participation of all employees, including executives.

1. Compliance

We uphold high ethical standards as professionals in pharmaceutical development and comply with laws and internal regulations.

2. Personal Information Protection

We strive to properly protect personal information based on Linical's Privacy Policy.

3. Security Measures:

To maintain information security, we conduct risk analysis on Information Assets from various perspectives and implement strict security measures based on the results.

4. Training and Awareness

We carry out training and awareness activities related to information security to promote the understanding and adoption of information security policy and related regulations.

5. Continuous Improvement

We regularly evaluate the effectiveness of the internal information security system and continuously improve to implement more effective system.
